PREFACE

The arrangement of the present volume of the *Inventories of Oriental manuscripts in Leiden University Library* does not differ in any way from the volumes which have been published earlier. For the sake of brevity I refer to my prefaces in those volumes. A few essentials may be repeated here.

The basic elements for each entry of the present inventory are: 1. class-mark, 2. language(s), 3. details of physical description, 4. survey of the contents, 5. provenance, 6. present location on the shelf. Depending on the nature of the material, exceptions and divergences are made from this strict arrangement. The collective provenance of a series of manuscripts is summarized in the form of a short text preceding the individual descriptions.

Few manuscripts mentioned in the present volume were viewed by autopsy, but some were. The sheer number of manuscripts makes it impossible to look at them all. The lists that I publish are based on the handwritten ledgers that are kept by the curators of Oriental manuscripts in the Leiden library. At a later stage complete autopsy may be achieved, but trying to achieve this at the present stage of the inventoring would seriously hamper the progress of the project, that is already taking much longer than I had anticipated.

When a manuscript was not inspected this can be seen from a simple typographical device. Whenever the indication of the shelf-mark is put between round brackets, I have not, or not extensively or sufficiently, inspected the manuscript, and its entry in the inventory is based mostly or entirely on secondary sources, be they published or not. These have, of course, always been indicated. When the shelf-mark is put between square brackets and preceded by an asterisk, this means that I have had the manuscript in my hands, at least once but probably more than once, and also that the description contains elements that can only be seen in the original manuscript, not from the existing library inventories. Such autopsy does not mean that I am, automatically, the author of all information given under that particular class-mark. When I am not, the description is always properly referenced.

The reader of this volume will notice that not all information of this series of a thousand manuscripts is available. In a limited number of cases the manuscripts could not be located. These I have indicated with the shelf mark "(presently [2015] not located. Mal. ??)". I am confident that these items will be located in a not too distant future. Anyway, their number is too small to delay the publication of the present volume much longer. In a somewhat larger number of instances I could not yet produce the cross references between photocopies of Balinese palmleaf manuscripts and their transcripts that have arrived through the Balinese Manuscript Project. When the work on the as yet unpublished volumes of my *Inventory* progresses these cross references are bound to be found. An update of the present volume will then be published, featuring the as yet missing information. In the present edition of this volume I have indicated the absence of such cross references with a double question mark. Here as well, I thought it undesirable to further delay the publication.

The present volume contains a very detailed description of the papers of the Bible translator Dr. J.L. Swellengrebel (1909-1985) that I received from his widow in the course of 1985. These papers are now registered as Or. 18.840-Or. 18.875. It is my intention to publish similarly detailed descriptions of other collections of papers, but I have decided to do that later, in an update to this volume. Here as well, I thought it more urgent to publish a complete inventory of the series Or. 18.801-Or. 19.000, than to go in-depth for a detailed description of other collections of private or scholarly papers. In the present volume, the J.H. Kramers Archive (Or. 18.094), the H.T. Damsté Archive (Or. 18.095) and part of the Snouck Hurgronje Archive (Or. 18.097) await an in-depth description. There are more collective units in this volume, such as the papers of the First Encyclopaedia of Islam (Or. 18.099) that also need an in-depth treatment. All this will have to wait till a later moment, however.

The pages in this volume are not numbered. The page numbers are omitted on purpose. As there will be regular updates to this volume (and to the other volumes of the *Inventory* for that matter), the pagination of the present edition is immediately invalid for all coming updates. The user of this inventory should instead refer to class-marks of the manuscript (the so-called Or.-numbers) and to nothing else. This *numerus currens* is the only stable and unchangeable element in my descriptions of the Leiden Oriental manuscripts.

I end with an important note. Although the set of inventories of which I am publishing here volume 19, contain descriptions of public and private collections, which will no doubt profit of the existence of electronic versions of my work, none of my inventories has ever been made at the express insistence or by the specific demand of these institutions, on the contrary I may say. The idea to compile such inventories, the invention of their structure, the acquisition of the necessary information from a multitude of primary and secondary sources, the way of publishing, all this is my own idea and it is my work alone. It is therefore my sole property and I assert the moral right of the authorship of form and content of these inventories, with ample reference, of course, to what I have said elsewhere about the method of compilation.

Collection of Javanese, and Balinese, manuscripts on palm leaf, purchased in September 1983 from I Gusti Ngurah Ketut Sangka of Krumbitan, Tabanan, through the intermediary of Mrs. Dr. H.I.R. Hinzler, Leiden. Mr. Ketut Sangka, who died in 1991, was at that time the local organizer of the 'Proyek Tik' in Bali. He was one of the sons of the last king of Krumbitan. He had been a life-long informant to C. Hooykaas (1902-1979), who first organized the Pryek Tik. His noble status enabled him to address owners of manuscripts irrespective of their cast. Dr. Hinzler succeeded him as co-ordinator to the Proyek Tik.

Diverse manuscripts purchased on 17 October 1983 by auction at Sotheby's, London.

Or. 18.161

Persian, with some Arabic, indigenous paper, 25 x 16 cm, 2 + 379 ff. (old foliation, now replaced by a modern foliation, which counts 381 ff.), old *naskh* script (in the old Persian spelling), book 2 was copied in one week, between 23 Gumada I and the end of the month (without specification of the year), two copyist (books 1-2; books 7-9), the first copyist is by Sa'd Allah b. Muhammad b. 'Uthman b. Muhammad al-Qazwini al-Mutatabbib (colophon f. 201a, he writes 25 lines to the page), the second copyist, who writes 19 lines to the page, is not mentioned by name, and though his hand is an old one, his writing seems to be of younger date than the first copyist, full-leather Islamic binding with repairs and replacements, with blind tooled and coloured ornamentation, of much more recent date than the MS. If the change of hands occurs between books 2 and book 7, it is possible that two incomplete copies of the book have been put together at a later date and then put these together into the present binding.

In the beginning of the volume, a later reader has added the punctuation of more modern Persian spelling, but this stops after a few pages.

The volume contains Books 1, 2, 7, 8 and 9 of the *Dhakhira-yi Khwarizmshahi*, the encyclopedic medical work compiled by Zayn al-Din Abu Ibrahim Isma'il b. al-Hasan al-Husayni al-Gurgani and dedicated to the Khwarazmshah Qutb al-Din Abu al-Fath Yamin al-Din (the ruler of Khwarizm, Qutb al-Din Muhammad, who reigned 490-521 AH, see de Zambaur, p. 209). Gurgani died in 531/1136 or in 535 AH. See Storey II/2, pp. 207-210, No. 361.

A survey of the contents of the nine books of the entire work is on ff. 4b-9b, which, however, has differences with the actual presentation of the material in this volume. The present volume only contains five books out of nine (books 1, 2, 7, 8, 9). Each book is preceded by a detailed table of contents. The tables of contents are often provided with number references to the folios in the present volume. Each book is subdivided in a

number of sections (*Guftar*), and each section is subdivided in a number of chapters (*Bab*). Some chapters are subdivided in paragraphs (*Fasl*). In the colophon to book 9, on f. 380a, there is mention of the supplement, *Tatimmat al-Kitab*, which bears the title *Maqala fi A`da` al-Hayawanat wal-Qarabadin*. This text is not available in the present volume.

ff. 9b-102b. Book 1. On generalities of the medical science.

ff. 103a-201a. Book 2. On the human body.

ff. 202b-306a. Book 7. On illnesses, from head till foot.

ff. ff. 307b-333b. Book 8. On the medicinal use of animals.

ff. 334b-380a. Book 9. On the treatment of harm inflicted by animals, a work on poisons.

The fly-leaf (f. 1a) contains some poetical quotations in Persian

- Some Arabic poetry on f. 2a, in an old *naskh* hand. The latter part (14 distichs) of a *Qasida*, on a medical subject, the first *misra`* is missing (paper torn), rhyming in *mim*, followed by a piece of three lines rhyming in *ta`*, followed by a *dubayt*, rhyming in *dad*, a piece of two lines, rhyming in *-bihi*, the beginning of another piece of two lines (damaged, one *misra`* and some words missing).

- On the title-page (f. 3a) is a dated owner's note: someone's birthday is noted down as a Wednesday in Dhu al-Qa`da 796; another birthday is dated 14 Rabi` I 797; another note is also dated 14 Rabi` I 797. Another owner has printed his seal and written a poetical line: *Sara hadha al-Kitab min Mali, Ahsana Allah bil-Huda Hali*.

- Notes in Persian on f. 2b, dated 29 Ramadan 796 (?)

- Medical notes in Persian on ff. 380a-381a. More notes on f. 381b.

- On f. 103a (title-page of book 2) an owner has written the title of the book, and his own name: Sahibuhu al-Da`if al-`Agiz Ahmad b. Mankali (?) al-`Adudi.

Or. 18.320

Arabic; indigenous paper (replacement on much younger paper: ff. 1-4, 43, 44 lower half only, 530, all containing quasi-Bihari script); 530 ff.; 26.9 x 14.5 cm (heavily cropped with considerable loss of marginal ornaments), expertly written fully vocalized Bihari script, black ink with rubrication for reading marks; 13 lines to the page (and sometimes less), the first, seventh and thirteenth lines written in a slightly larger script than the rest; *Tahlil* (gold ink, with black outline); simple hand-drawn verse dividers: gold circle with black lines, representing a flower with six petals with blue dots on the circumference and a red dot in the centre; illuminated Sūra headers in a horizontal band of the height and width of one line of text, usually,

and with an illuminated circle in the outer margin, with text in Thuluth script, written in white ink on a gold background; numerous double illuminated pages, possibly partly of later date, to indicate the beginning of a *Ġuz'* (2: ff. 18b-19a; 3: ff. 34b-35a; 4: ff. 50b-51a; 7: ff. 99b-100a; 8: ff. 116b-117a; 9: ff. 134b-135a; 10: ff. 150b-151a; 11: ff. 165b-166a; 12: ff. 182b-183a; 13: ff. 200b-201a; 16: ff. 252b-253a; 19: ff. 303b-304a; 20: ff. 321b-322a; 21: ff. 338b-339a; 22: ff. 356b-357a; 23: ff. 374b-375a; 24: ff. 393b-394a; 25: ff. 411b-412a; 27: ff. 449b-450a; 30: ff. 507b-508a) or a *Sūra* header (Āl 'Imrān: ff. 40b-41a; al-Nisā': ff. 62b-63a; al-A'rāf: ff. 124b-125a; al-Ĥiġr: ff. 217b-218a; Banū Isrā'īl = Sūrat al-Isrā': ff. 234b-235a; Maryam: ff. 255b-256a; al-Anbiyā': ff. 270b-271a; Šād: ff. 384b-385; al-Aḥqāf: ff. 430b-431a; al-Muġādila: ff. 468b-469a; al-Mulk: ff. 487b-488a; al-Naba': ff. 507b-508a = beginning of *Ġuz'* 30) at the end of the text: ff. 528b-529a and the end of the volume with *Sūrat al-Falaq* and *Sūrat al-Nās*: f. 530a; having the double illuminated pages at the beginning of the *Aġzā'* and the *Sūras* assumes an elaborately worked out lay-out operation by the copyist; verse counters and *Ĥizb* counters in the margins, the latter indicated by illuminated circles; dated 811 (1408-1409), copied by Muḥammad b. Ma'rūf b. Ḥamīd b. Maḥmūd b. Mawfūq al-Rāḍī (colophon on f. 530a, but this is written on a modern replacement, though possibly authentic as far as the text is concerned); the constitution of the quires could not be established due to the tight binding, which makes it even impossible to locate the hearts of the quires; interlinear and marginal notes in Arabic and Persian (e.g. f. 520a) in hands different of the copyist's; catchwords at the bottom of every verso page, but these are later additions and therefore unreliable; European-style full-leather binding, on spine: *Qur'ān Sharif*, on the front board: *Qur'ān Maġīd*.

A one-volume copy of the *Qur'ān* (Qur'an), followed on f. 530a by what is called a *Du'ā' Khatm al-Qur'ān*, but which is in fact nothing more than a *Taṣḍīq* of a few lines.

Earlier provenance: Sotheby's London, auction 20 June 1983, No. 175. Purchase from Alan G. Thomas, an antiquarian bookseller in London, September 1984. In the volume '175' is written in pencil on the inside of the end board. Als a loose insert from Sotheby's between the flyleaves at the end with: '20.6.83 | Lot 175'.

H.I.R. Hinzler, 'Inventaris van de wetenschappelijke notities van Dr. J.L. Swellengrebel, zoals deze zijn gedeponereerd in de Bibliotheek der Rijksuniversiteit te Leiden (Cod.Or. 18.840-18.875)'. Leiden 1985 (unpublished).

The preceding description of the Swellengrebel collection in this volume 19 of my *Inventory* is an English translation of the complete text of Ms. Hinzler's 'Inventaris' that is written in Dutch. While translating the text, I have bibliographically improved it somewhat. I could easily do that because in the past thirty years the possibilities to find information on the internet have become enormous. Way back in 1985 such possibilities did not exist. I have not, however, amended Ms. Hinzler's inventory by autopsy of the materials described by her.
